

Cannabinoids in Clinical Practice

June 21, 2013, 8:50am-5:00pm • University of British Columbia, Vancouver, Canada

Continuing Medical Education • Patient case
Basic and Clinical Science • Expert presentations
Panel and group discussions • Q & A

Program Learning Objectives:

- ✓ Identify clinically relevant components of herbal cannabis and the endocannabinoid system
- ✓ Discuss research into the use of cannabinoids for the treatment of mental health, anorexia, pain and spasticity
- ✓ Recognize risks associated with the use of cannabis as medicine
- ✓ Consider clinical, research and patient perspectives on a highly stigmatized treatment option

Stay for the 2013 Annual meeting of the (ICRS)
International Cannabinoid Research Society
CCIC/ICRS Reception June 21, 6pm
ICRS Conference June 22-25 at UBC

Presenters

Donald Abrams, MD

University of California San Francisco

Lynda Balneaves, RN, PhD
